Quick Buyer Guide

This catalogue serves two very different readers, and you don't need to read it front-to-back. Use whichever path matches you.

Sourcing bulk agricultural, biomass, or industrial inputs?

You likely don't need the heritage story to make a sourcing decision. Use the summary table on the next page for MOQ and HSN codes at a glance, then jump straight to **Category 01 · Agriculture** (page 10) or **Category 04 · Fuel / Biomass** (page 13) for full specs. Read **Our Sourcing Network** (page 9) only if traceability of supply matters to your compliance or ESG team.

Sourcing ritual, temple, or diaspora-retail products?

Our **Heritage** and **Sourcing Network** sections (pages 6–9) speak directly to the story your own customers respond to — start there, then go to **Category 02 · Ritual / Temple** (page 11) or **Category 03 · Cremation / Funeral** (page 12).

Sourcing spices, foods, rice, textiles, or other general agri & lifestyle products?

Cow dung is our founding line, not our only one. Turn to **Our Complete Product Range** (next page) for a full visual index of every category we source and export, then see **Custom Sourcing** (page 14) for detail on each.

On pricing: this catalogue is intentionally quote-on-request throughout. Final FOB pricing depends on order volume, packaging, destination port, and current market rates at the time of your enquiry — send us your specification and we'll respond with a formal quotation, typically within 24 hours.

Our Complete Product Range

Cow dung-based organic products are where we started — and remain our flagship line — but Kapi Dwaja Exports is a full merchant export house. Across eleven categories, we source, quality-check, and export from verified farms, FPOs, cooperatives, and processors across India.

See the **Incoterms & HSN Code Note** (page 20) for guidance on reading HSN codes marked with an asterisk (*). Custom sourcing HSN codes are confirmed per product specification at enquiry stage.

Our Name, Our Story

The Chariot That Carried Dharma

In the great Indian epic Mahabharata, when the warrior Arjuna rode into the battle of Kurukshetra, he did not ride alone. His chariot — a divine gift from Lord Agni, the god of fire — was driven by Lord Krishna himself, and above it flew a sacred flag bearing the image of Lord Hanuman: the embodiment of strength, devotion, and unwavering service. This chariot was known as Kapi Dwaja — “the one with Hanuman’s flag.”

It was not merely a vehicle. It was a symbol of purity guiding power, of divine wisdom steering strength toward righteous purpose. Four magnificent horses carried it forward — together, unstoppable.

We chose this name, and this symbol, with intention.

Kapi Dwaja Exports carries forward a similar purpose: to take what is pure, powerful, and rooted in India’s ancient wisdom, and guide it confidently onto the world stage. Long before “organic” and “sustainable” became global buzzwords, India’s villages and temples already practiced this wisdom — using cow-based products in agriculture, ritual, and daily life, exactly as they had for thousands of years.

We began with what the world is only now rediscovering: the sacred, agricultural, and organic power of cow dung. It is the first product of what we intend to be a much larger mission — to bring India’s undiscovered treasures, its agricultural heritage, and its ancient knowledge to buyers across the globe.

Like the chariot after which we are named, we carry something powerful forward — with purity guiding every step.

— The Chariot of Indian Heritage, Exporting Prosperity

About Kapi Dwaja Exports

Kapi Dwaja Exports is based in Ramachandrapuram, Dr. B.R. Ambedkar Konaseema District, Andhra Pradesh, India. We identify, quality-check, and export organic and agricultural products from verified manufacturers, farms, and processors across India, delivering to global buyers with full documentation support.

SOURCING

Our Business Model

We operate as a professional sourcing and export house — identifying verified manufacturers, farms, and processors across India, and managing quality control, packaging, documentation, and shipping. This gives you a single, accountable point of contact for your India sourcing needs, without the complexity of managing multiple local vendors directly.

Our Core Specialization

We specialize in cow dung-based organic products — a fast-growing segment in India's agricultural export market. Our products are sun-dried, chemical-free, and export-grade, sourced from desi cow farms across Andhra Pradesh through a verified producer network.

Global Reach

We are building export relationships across the USA, UK, UAE, Italy, France, Australia, Singapore, Maldives, Saudi Arabia and more. Port of loading is selected based on product origin and destination, using major gateways across Andhra Pradesh and India for the most efficient route.

Custom Sourcing Capability

Beyond cow dung products, we source a wide and growing range of agricultural products from India — spices, fruits, vegetables, grains, pulses, dry fruits, and organic inputs — based on your specific requirement. One partner for your India sourcing needs.

Business Structure

Kapi Dwaja Exports operates as a proprietorship, registered under GST and Udyam (MSME) as detailed in the Certifications section. At our stage, that means single-point accountability: one decision-maker, directly reachable, with no layers between you and the person responsible for your order. All trade documentation, invoicing, and banking are conducted consistently under this one registered entity, verifiable directly against our GSTIN and Udyam registration for your bank's KYC or Letter of Credit requirements.

Independent Verification

We would rather you verify us independently than take our word for it. Our GSTIN and Udyam registration can both be checked directly: search our GSTIN (37HTEPD2021Q1ZJ) at services.gst.gov.in under 'Search Taxpayer', and our Udyam registration (UDYAM-AP-18-0049059) at udyamregistration.gov.in. A bank reference letter can be arranged on request through our banker.

Why Source From Us?

We hold active GST, MSME (Udyam), IEC, APEDA RCMC, and FSSAI registrations, along with an active AD Code for international banking — the core requirements for export from India. All shipments include Commercial Invoice, Packing List, Bill of Lading, Certificate of Origin, and Phytosanitary Certificate, with Fumigation Certificates and NPPO reports arranged as required. Custom packaging, private labeling, and branding are available for all products. Organic certifications (NPOP, EU Organic, USDA Organic) are available on request for qualifying products — see the Certifications section for scope and detail.

How First Orders Typically Work

If this is your first time sourcing from us, we'd recommend starting the same way most of our buyers do: a small paid sample, or a trial LCL (less-than-container-load) shipment, before committing to a full container. That's not a compromise on our end — it's the right way to start any new supplier relationship, and several of our product lines have MOQs well below a full container specifically to make this easy. It lets you verify our documentation, packaging, and quality claims hold up in practice, at low cost, before scaling to a recurring or full-container order.

Production & Supply Capacity

We verify production capacity directly with our sourcing partners rather than rely on a stated figure alone. Share your target order volume, delivery schedule, and whether you're planning a one-time or recurring annual order with your enquiry — we will confirm a realistic production and delivery timeline, including any phased ramp-up plan for larger repeat volumes, before issuing a quote.

- ✦ Paid sample orders before any bulk commitment
- ✦ Flexible payment structure — see Payment Terms, page 19
- ✦ Third-party pre-shipment inspection available on request (SGS, Bureau Veritas, or Intertek)
- ✦ Indicative lead time: 15–21 business days for a first shipment, subject to product & destination

Our Sourcing Network

Our sourcing network spans multiple verified farms, producer groups, and agricultural processors across Andhra Pradesh and neighbouring states — this is not a single relationship, and not anonymous, mixed-source collection.

Every product in our flagship cow dung line is supplied through a direct tie-up with an established, export-grade producer network recognized for consistent quality and output — not sourced opportunistically from random or unverified collection points. Raw material moves through a traceable supply chain from source to shipment, with quality checks at each stage.

We are actively expanding this network further, with ongoing conversations underway with additional producers and cooperatives to broaden the same standard of traceable, quality sourcing across our full product range — so a short-term supply constraint at any single source does not stop an order.

Factor	Random / Mixed-Source Dung	Our Verified-Network Dung
Breed	Unknown / crossbred	Indigenous Indian desi breeds
Feed	Variable, often commercial feed	Natural grass and fodder feeding
Source integrity	Anonymous collection	Traceable to a verified producer network
Consistency	Variable	Controlled, verified supply chain

For traceability-conscious buyers: if your compliance or ESG team requires supply-chain documentation beyond our standard certificates, let us know at enquiry stage — we can share additional sourcing detail directly, under a mutual confidentiality understanding where appropriate.

Agriculture / Organic Farming

01

100% organic, chemical-free soil enrichers and organic fertilizers. Strong global demand from EU, USA, Japan, and Gulf countries for certified organic farming inputs.

AGRICULTURE

BEST SELLER

Cow Dung Manure / Cakes / Powder

Sun-dried, chemical-free cow dung — supplied as raw manure, hand-shaped cakes, or fine-milled powder for direct field application and soil conditioning. Sourced from desi cattle, retaining a natural nutrient profile that mixed-breed or commercially-fed cattle dung cannot easily match.

MOQ	1 MT (cakes/powder: 500 kg)
HSN Code	3101.00.91
Moisture	≤ 12%
Organic Carbon	≥ 18%
Packaging	25kg / 50kg HDPE bags, jumbo bags
Shelf Life	12 months (dry storage)
Container Yield	~18–20 MT per 20' container
Certifications	Phyosanitary + CoA per lot

AGRICULTURE

Vermicompost

Worm-castings-based organic fertilizer, cured from cow dung feedstock. Rich in NPK, beneficial microbes, and humic acid — suitable for retail garden markets as well as large-scale commercial farming operations.

MOQ	500 kg
HSN Code	3101.00.99
Moisture	≤ 30%
N : P : K	1.5–2.0 : 1.0–1.5 : 0.8–1.2
pH	6.5 – 7.5
Packaging	5kg / 25kg / 50kg bags
Shelf Life	24 months
Container Yield	~22 MT per 20' container

Interested in either product? Request a sample or a formal quote — see contact details on the last page.

Ritual / Temple

02

A fast-growing export category, driven by a 35.4 million-strong global Indian diaspora (NRIs and PIOs combined, per Ministry of External Affairs, Government of India data). High margin, lightweight, airfreight-compatible.

RITUAL & TEMPLE

BEST SELLER

Cow Dung Agarbatti (Incense Sticks)

Hand-rolled incense sticks made from dried cow dung and natural herbs — bamboo-free, chemical-free, with a traditional Vedic fragrance and noticeably lower smoke than conventional incense. Used daily in Hindu households, temples, and wellness spaces.

MOQ	500 kg (packs)
HSN Code	3307.41.00
Sizes	8" / 9" / 11" / custom
Fragrance	Sandal, rose, herbal, unscented
Packaging	Box of 20 / 50 sticks
Shelf Life	24 months
Private Label	Available (MOQ 500 boxes)

RITUAL & TEMPLE

Dhoop Sticks

Thick, slow-burning dhoop sticks blended with cow dung and natural resins, crafted using a traditional Vedic recipe — bamboo-free and low-smoke. Popular for temple aarti and daily home puja.

MOQ	500 kg (boxes)
HSN Code	3307.41.00
Sizes	4" / 6" / custom
Burn Time	15–20 minutes per stick
Packaging	Box of 10 / 20 sticks
Shelf Life	24 months
Private Label	Available (MOQ 500 boxes)

RITUAL & TEMPLE

NEW

Havan Cups / Sambrani Cups

Pre-shaped cow dung cups molded for Vedic fire rituals, available plain or herb-enriched — burn clean, hold shape, and ignite easily without additives. A favourite for temples, ritual retailers, and diaspora communities.

MOQ	500 kg (packs)
HSN Code	3307.41.00
Diameter	4–5 cm (standard)
Moisture	≤ 10%
Packaging	Pack of 25 / 50 / bulk carton
Shelf Life	18 months

03 Cremation / Funeral

Growing demand in the UK, USA, Canada, and Australia among Hindu, Sikh, and Jain diaspora communities seeking authentic, eco-friendly alternatives to firewood.

CREMATION & FUNERAL

Cow Dung Logs (Cremation Grade)

Machine-compressed, log-shaped cow dung fuel logs sized for cremation ghats — a traditional, zero-deforestation alternative to firewood, offering a uniform, sustained burn.

MOQ	1 MT
HSN Code	4401.31 / 39.00 — working classification*
Length	30–45 cm (standard)
Moisture	≤ 12%
Burn Duration	Extended, steady burn
Packaging	Bundled / bulk pallet
Container Yield	~16–18 MT per 20' container

CREMATION & FUNERAL

Large Cow Dung Cakes (Cremation Grade)

Oversized, hand-shaped cow dung cakes, sun-dried for a dense, longer burn — formulated for high, sustained heat and supplied for cremation grounds and large ceremonial fires exactly as practiced for centuries.

MOQ	1 MT (0.5 MT trial)
HSN Code	4401.31 / 39.00 — working classification*
Diameter	18–25 cm
Moisture	≤ 12%
Packaging	Stacked bundles / bulk
Container Yield	~16–18 MT per 20' container

*** Working HSN classification:** Chapter 44 (4401.31.00 / 4401.39.00), matching Briquettes, since these are combustion products for funeral pyres rather than fertilizer. This is a professional working position pending final broker sign-off — we recommend an Advance Ruling from CAAR (Customs Authority for Advance Rulings) for permanent certainty on this line. Please confirm independently with your own customs broker before booking a shipment in this category.

04

Fuel / Biomass Energy

Compressed cow dung fuel blocks for industrial boilers, brick kilns, and clean cooking fuel. A renewable, low-sulfur, carbon-neutral alternative to coal and firewood.

FUEL & ENERGY

BEST SELLER

Cow Dung Briquettes

High-density, machine-pressed cow dung briquettes for boilers, brick kilns, and biomass power plants — a low-ash, low-sulfur, carbon-neutral alternative to coal, supporting buyers' sustainability and ESG sourcing commitments.

MOQ	5 MT
HSN Code	4401.31.00 / 39.00*
Calorific Value	~3,000–3,600 kcal/kg
Moisture	≤ 12%
Ash Content	≤ 18%
Size	Ø 60–90mm, length on request
Packaging	Loose / 25kg bags / bulk
Container Yield	~24–26 MT per 20' container

FUEL & ENERGY

Biomass Fuel Blocks

Compressed rectangular fuel blocks blending cow dung with agri-residue for higher density and longer burn time in industrial furnaces — a sustainable, renewable fuel option for buyers with dedicated biomass handling systems.

MOQ	5 MT
HSN Code	4401.31.00 / 39.00*
Calorific Value	~3,200–3,800 kcal/kg
Moisture	≤ 10%
Ash Content	≤ 15%
Size	Standard block, custom on request
Packaging	Loose / bulk pallet
Container Yield	~24–26 MT per 20' container

*** HS Code Note:** Classified under Chapter 44 (agglomerated biomass fuel); please confirm the final tariff line with your customs broker before booking.

Beyond Cow Dung: A Full Merchant Export Catalogue

As a merchant exporter, we're not limited to the range above. Through direct connections with farmers, Farmer Producer Organizations (FPOs), cooperatives, processors, and artisan clusters across India, we source and export the categories below — quoted separately, on request, with the same documentation rigor as our flagship line. India is the world's second-largest agricultural producer — we leverage our supplier network across Andhra Pradesh, Telangana, Karnataka, Maharashtra, Gujarat, and Rajasthan to source competitively and export to your doorstep.

Direct Farmer Connect

FPO Partnerships

Verified Cooperatives

Certified Processors

Artisan Clusters

Fresh Fruits & Vegetables

Mangoes, bananas, pomegranates & seasonal vegetables — cold-chain handled and export-graded from farm to port.

Source: **Farmers & FPOs** · MOQ: **On Request**

Spices

Turmeric, red chilli, cumin, cardamom, black pepper — graded and export-packed to destination requirements.

Source: **Farmers & FPOs** · MOQ: **On Request**

Organic & Processed Foods

Jaggery, honey, cold-pressed oils, pickles — sourced from verified processors for retail and bulk buyers.

Source: **Processors & Co-ops** · MOQ: **On Request**

Ayurvedic & Herbal Products

Herbal extracts, essential oils, agarbatti — sourced from established Ayurvedic manufacturers.

Source: **Manufacturers** · MOQ: **On Request**

Rice & Cereals

Basmati, non-basmati, millets — sourced directly from farmers, FPOs, and processing units.

Source: **Farmers & FPOs** · MOQ: **On Request**

Handicrafts & Home Décor

Brass, wood, bamboo, handmade paper — artisan-made pieces sourced through verified workshops.

Source: **Artisan Clusters** · MOQ: **On Request**

Textiles & Home Furnishings

Handloom fabrics, cotton furnishings — sourced from weaving clusters and certified textile units.

Source: **Weaving Clusters** · MOQ: **On Request**

Send Us Your Requirement

Have a specific requirement, cow dung-based or otherwise? Send us your product specification, quantity, destination country, and preferred incoterm. We will respond promptly with sourcing confirmation and a competitive quote. **Don't see your product listed?** Sourcing new categories through our direct farmer, FPO, and supplier network is part of how we work — ask us before you assume it's not possible. New product lines are onboarded only through verified supplier tie-ups, confirmed before any export commitment is made to a buyer.

- ✦ Product name & specification
- ✦ Quantity (MT / kg)
- ✦ Destination port
- ✦ Incoterm preference (FOB / CIF, or as required)
- ✦ Target price (optional)
- ✦ Required certifications

We'd rather earn trust through documentation than through reviews we can't stand behind. Every registration in this catalogue — GST, MSME, IEC, APEDA — is verifiable directly with the Government of India. We are happy to share Certificates of Origin, Phytosanitary Certificates, and other shipment documents up front, and to connect over a video call before you commit to an order. Start with a sample or a small trial order — we'll earn the rest.

Certifications & Registrations

Kapi Dwaja Exports maintains active registrations across every core requirement for exporting from India — verifiable directly with the Government of India.

✓ GST Registration GSTIN: 37HTEPD2021Q1ZJ ACTIVE	✓ MSME / Udyam Registration UDYAM-AP-18-0049059 ACTIVE
✓ IEC — Import Export Code Issued by DGFT, Govt. of India ACTIVE	✓ APEDA RCMC Agri & Processed Food Export Dev. Authority ACTIVE
✓ FSSAI Licence Food Safety & Standards Authority of India ACTIVE	✓ Bank AD Code SBI, Kakinada SME Branch — trade banking ACTIVE

Per-Shipment Document	Details	Status
Phytosanitary Certificate	Issued by Plant Quarantine authority — pest and disease-free certification	Per Shipment
Fumigation Certificate	Confirms treatment against pests for packaging material / cargo	Per Shipment
Certificate of Origin	Issued by Chamber of Commerce confirming goods originate from India	Per Shipment
NPPO Report	National Plant Protection Organization compliance report, where applicable	Per Shipment

Available on Request	Details	Status
NPOP Organic Certification	India's National Programme for Organic Production, under APEDA	On Request
USDA Organic (USA)	For US organic claims; requires a direct USDA-accredited certifier	On Request
EU Organic Certification	Required for labeling products "organic" in EU member states	On Request
MSDS	Material Safety Data Sheet for incense and ritual products	On Request

NPOP / EU Organic Equivalence

An important note for buyers considering an organic claim on cow dung-derived products.

NPOP–EU organic equivalence remains active for many plant-derived product categories, but it explicitly excludes livestock and animal-derived products, which require separate, direct EU organic certification because NPOP's livestock standards differ from the EU's. Cow dung-derived fertilizer sits in an ambiguous category — it is not a plant product but an animal byproduct.

Our policy on this is fixed, not case-by-case guesswork: we never state “NPOP recognized, broadly equivalent to EU Organic” for any cow dung product without first confirming, in writing, with our certifier (Control Union, OneCert Asia, Ecocert, or equivalent) whether that equivalence extends to animal-manure-derived fertilizer for that specific order, or whether separate EU certification is required, as it is for dairy and meat. Every EU-bound quotation states this status explicitly before shipment — this is a standing confirmation step for every order, not an unresolved question.

Additional certifications such as NPOP Organic, ISO 9001, or product-specific lab testing are arranged per buyer-country requirement. We prefer honesty over inflated credentials, and we will not claim a certification we don't hold.

Quality Assurance & Testing

We do not currently operate an in-house testing laboratory, and we won't imply otherwise. For shipments where testing matters — which we'd expect for most first orders in this category, given several of our products are animal-derived — we arrange third-party testing through independent accredited labs prior to dispatch, on request. This includes NABL-accredited laboratories in India, or international inspection agencies such as SGS, Bureau Veritas, or Intertek, depending on where the report needs to be recognized.

Product Category	Relevant Tests	Typically Requested By
Cow dung cakes, powder, vermicompost	Heavy metal screening (lead, cadmium, arsenic, mercury); microbial/pathogen testing (E. coli, Salmonella)	EU and other regulated markets on organic fertilizer / soil amendment imports
Cremation logs & large cakes	Microbial/pathogen testing; calorific value and moisture content on request	Compliance-conscious buyers and destination customs
Briquettes / biomass fuel blocks	Calorific value (kcal/kg), moisture content, ash content	Industrial boiler and brick-kiln buyers, who specify fuel by these figures rather than weight alone
Dhoop, agarbatti, havan cups	MSDS covers material safety; fragrance/chemical compliance testing available on request	Markets with specific consumer-product regulations

Our sun-drying process is a natural step that reduces pathogen load in raw dung before further processing — this is inherent to how the product is made, not a substitute for a lab-issued Certificate of Analysis where one is required for customs clearance or your own QA sign-off. Let us know at enquiry stage if a Certificate of Analysis should be built into your quotation and shipment timeline, so we can factor it into the lead time upfront rather than as a delay later.

Payment Terms & Lead Times

Clear, straightforward terms designed to protect both parties while keeping the process simple for new and repeat buyers.

First-Time Orders

100% Advance (T/T), or an Irrevocable Letter of Credit (L/C) at sight. This is our preferred structure for a first order with a new buyer.

Repeat / Trusted Buyers

30% Advance (T/T) at order confirmation, with the balance 70% payable against a copy of the Bill of Lading — available once a working relationship is established.

Sample Orders

100% advance payment for sample or trial orders, adjustable against your first bulk order upon confirmation.

Accepted Payment Modes

Bank Wire Transfer (T/T) and Letter of Credit (L/C at sight). Additional modes considered on request for established buyers. Final payment terms are confirmed in writing on the Pro Forma Invoice issued for each order before production begins.

Indicative Shipping Lead Times

Destination	Transit Time
Gulf countries (UAE, Saudi Arabia, Oman)	7–12 days
South East Asia	12–18 days
Europe	20–28 days
USA / Canada	25–35 days
Australia	18–25 days

Production and packing typically add 7–15 days ahead of shipping. Total lead time is typically 4–6 weeks from order confirmation, depending on product, order volume, and any testing or inspection requested.

Incoterms We Support

FOB — Free On Board (RECOMMENDED)

Our responsibility ends when goods are loaded on the vessel at the Indian port of loading. The most common and cost-transparent choice for experienced buyers.

CIF — Cost, Insurance & Freight

We cover cost, insurance, and freight to your destination port — a convenient option for buyers new to importing from India.

Other terms — CFR, EXW, DAP — are available on request depending on your logistics setup and order volume. Let us know your preference and we'll confirm feasibility with your quote.

Important HSN Code Note for Buyers

HSN = India's 8-digit Harmonized System Nomenclature, used on our export paperwork. Your destination country will apply its own national tariff code (often 6–10 digits); your customs broker can cross-reference it from the HSN shown here.

Cow dung cakes and powder/manure are classified under HSN 3101.00.91 (Chapter 31 — organic fertilizers); vermicompost under HSN 3101.00.99. Ritual incense products (dhoop, agarbatti, havan cups) fall under HSN 3307.41.00. Cow dung briquettes used as biomass fuel are classified under HSN 4401.31.00 / 4401.39.00 (Chapter 44 — agglomerated biomass fuel).

Cremation-grade logs and large cakes are carried under our working classification of HSN 4401.31.00 / 4401.39.00 (Chapter 44), matching Briquettes, since these are combustion/fuel products for funeral pyres rather than fertilizer. This is a professional working position, not yet a binding classification — we are pursuing an Advance Ruling from CAAR for permanent certainty on this line. We recommend buyers confirm independently with their own broker before booking a cremation-category shipment.

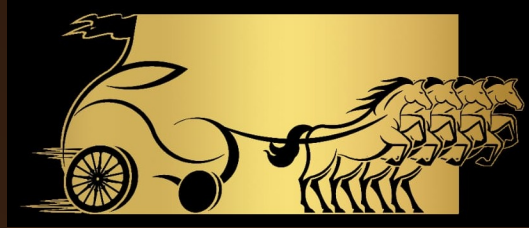

In all cases, please verify final HSN/HS classification with your customs broker before placing orders, as interpretation can vary by destination country. All pricing is quoted formally on a Pro Forma Invoice, confirmed against current market rates at the time of your enquiry.

Ready to Ship Worldwide

Our products meet international phytosanitary standards. We are actively building buyer relationships across the markets below — don't see your country? Contact us; we export worldwide.

● India — Kapi Dwaja HQ	● UAE	● Saudi Arabia
● Oman	● Maldives	● Malaysia
● Singapore	● Indonesia	● United Kingdom
● Germany	● Netherlands	● Italy
● France	● Australia	● United States
● South Africa	● Nigeria	● Bangladesh
● Sri Lanka	● Japan	

Port of loading is selected based on product origin and destination — typically Visakhapatnam, Chennai, or Kolkata, using whichever gateway is nearest to the relevant supplier for that shipment.
